

## **New Dynavert flyer**

On the DYNAVERT inverter series an extensive flyer is obtainable.

In addition to the general product representations this document includes detailed and order information and with approx. 25 pages it is a comprehensive catalogue. Thus the flyer is the perfect basis for product advice also with respect to the ETO product basis as well as further use of information (such as MLFB) in tools.

This flyer has now been revised and is expected to be generally available as of July.

The updating includes in addition to various information extensions also the integration of the line harmonics filter and latest new products.

PDF download is still possible from the following intranet site:

<https://www.automation.siemens.com/mcms/infocenter/>

The printed version can be ordered as usual under the following reference numbers:

E20001-A40-P580-V2 (German)

E20001-A40-P580-V2-7600 (English)
